Before your get started.

First of all, RSA does not work on IE or Edge. Every RSA update is tested on Chrome and Safari; it does work on Firefox and Opera, but is not tested on either, so if you want to be on the safe side and avoid any potential glitches, use either Chrome or Safari.

RSA contains a lot – A Lot – of data; therefore, you do need a fast internet connection as well as a bit more than the most basic of computers. An I5 Intel processor or comparable will be useful, and 16+ Mb of RAM will not be wasted either. That said, you can make do with less memory, especially if you want a character-building exercise in patience.

Once you truly get into it and know the various apps like the back of your hand, it'll save you – or make you – money. The business of betting is highly time sensitive. Once the race starts, a lot can happen, and you are likely to have a very good idea what happens if you looked at the data in detail. If your computer or internet connection is slow and you cannot place your bets right at the off, you'll stumble. But expect it with a slow computer/connection and save up for a better computer and faster internet, and it won't take long.

RSA members have access to the Telegram chatroom. Telegram is a chat client similar to WhatsApp, but with more encryption and more privacy. If you don't have Telegram yet, you can go to telegram.org and get yourself set up with a username as well as choose the method to access it. App on phone, desktop app, or in your preferred browser; they all work equally well. In the chatroom, we share our successes as well as frustrations if a horse dares not read the script, and if you have questions, the answer to which cannot be found in the videos or this manual, someone will likely be able to provide it. There are many ways to bet successfully, and we share freely. The rules are simple: treat everyone as you would like to be treated. And: don't swear. So, once you do have a Telegram account, provide your username and in your second month of paid membership, you'll receive an invite.

Make the time to learn it. Watch the videos; they are numbered 1 through 10, and then there are some more. Watch them in order; watch them more than once. Practice. Go into the Training part of the app and play past races. Allow about 30 hours of training before even thinking of placing a bet with real money. Familiarise yourself with Bet Finder. Learn what to look for until it becomes second nature. Then watch the odds move in a live race, predict which one is likely to win or lose.

Learn to find a reason to play a race; don't fall into the trap of FOMO (fear of missing out). There are, on average, well over 30 races every day in the UK (except Christmas Day); there is no reason to bet on all of them. Learn to find the ones worth playing, and if there aren't any today, there will be more races tomorrow. It is more satisfying to spend 10 minutes a day making a half day's wage than to spend hours and hours making an hour's wage or – wore -- losing money. Keep that in mind when you find races that are worth playing.

A note for a recent New User

Hello Everyone, I assume that if you are reading this then you are either currently doing a trial in RaceStatsApp or have done a trial and decided it's not for you. Before you make a final decision, I would like you consider the following regarding my situation.

I came to RSA almost by accident after looking at many form based tipping sites and having no real success. I have been an old school punter for many years and now at over 60 years old and semi-retired was looking at these sites to see if I could supplement my income punting, a foolish proposition I soon found out as you would have to be in the top 2% to 5% of players in Betfair to do that. Frankly, I was just losing my money. When I stumbled upon RSA, I thought what the hell is this, so decided to do a trial just out of curiosity. When I opened it, I was very sceptical, I saw no horses names no jockeys no form analysis. All I saw was numbers and frankly I am not much good with numbers. What I did see however was a bit of a pattern of a particular favourite number winning a race in consecutive years in the same type of races and sometimes the same tracks. This was what intrigued me enough to subscribe for one month just to see where it all went.

Well it didn't go very well to tell the truth, the same old pattern of losing money started again and I just couldn't work out the numbers or the method it was just so complicated, I couldn't make head nor tail of it. In frustration I contacted mike and told him app was not for me and I would not renew. Mike then gave me access to the RSA chat room which I was not really interested in joining but went in had a look anyway. In the chat room I met a lot of people who had been with RSA for a long time and they were posting results and picking winners between 15/1 and up to 60/1.

They seemed to know when an odds favourite was going to get rolled and that really sparked my interest especially the odds-on favs that were getting beaten. Like the average punter I always tried to win money backing odds on favourites so I went back and had a look a look at one I had backed several months earlier and had lost big on when it lost the race to a rank outsider. I brought the race up in RSA training and low and behold the odds on favourite according to RSA GOING TO LOSE, RSA told me no way should I have backed it, that favourite at that price on that day was due to lose. That was a revelation to me, I decided at that point I would persevere with it and try to make it work.

Well it has not been easy, but I really needed the income in my retirement so I went into training and spent hours and hours learning odds and reading them, and gradually somethings started to fall into place to the point now where I am making a modest profit and am gradually building confidence, but hell its hard work complicated and time consuming. But you know what they say, nothing that is worthwhile is ever easy and I believe RaceStatsApp is definitely the most powerful racing application to find winners out there no doubt in my mind now at all. So in conclusion if you have taken the trial and decided not to proceed I reckon you need to do yourself the service of going back in to rediscover it as I did, go back and re-watch all the training videos and do the work required to succeed .

Good Luck and do not give up. *Gary Dodge*

3.0 The Icons

User Settings: Click here to manage your subscription

Log out. Click this icon to instantly log out of RaceStatsApp

Settings Icon: Click this to edit / import / export settings (S1, S2 etc). Icon only available if the following is selected, In BSP Check if logged into Betfair and a race time selected. In BSP Training when a date in the paste is selected and then a race time.

Time and Special events; Use this to filter by time and to select special days Like Boxing day and New Years days races for all years. As these days fall on different days each year.

Play (Go) After selecting your filters and to see the results of those filters click here. When selecting race times there is no need to click this.

Save Settings. Use this when in Bet Finder or BSP Checker to save the settings you have used to find a strategy in Bet Finder so you can come back the next day and quickly see the results. Or use it to save races that required special use of filters.

Recall Above Settings. Click here to view all save setting by date. Select the day you saved the settings than click on the name you gave them. i.e. Strategy 3 or Ascot 13:20

Reset. Click here to reset all filter back to ALL and week to current week.

Reset Race Times. Used in 2 ways, to bring up todays races if not showing and to reset races after a meeting has been abandoned (Oz Only)

Click here to show all filters in selected so you can remove a few, easier than selecting 90%. When Showing the Plus sign ALL filters selected, when showing minus sign you can/have selected those you wish.

4.0 The Filters

Winners

Losers

Only available when in Bet Finder. When winners selected in ALL data results you will only see information relating to the winners of races. When Losers selected you will only see in filtered results data information relating to all those that lost races. E.g. If you filter down to one race with 9 runners, Winners will show one runner and Losers will show 8 in all filtered Data Results.

Find a Week	11/08/2020	Set Weeks		Set IP		Set SP		Set No. Ran	
Week of Date	33	From	33 ▼	£ IP >=	% IP >=	SP >=	1.00	From	1 ▼
Day of Date	3	To	33 ▼	0	0	SP <=	1002.00	To	50 ▼

Find a Week: Is used in 2 ways In BSP Training you MUST select a day in history using this control to have the race times of that day available to play. It can also be used to find what day and week any date falls on. These are displayed underneath the selection control.

Set Weeks: Use these to select the period you wish to search for data. (Controlled Automatically By Settings - CABS)

Set IP: If **Winners** selected (as above) these will be pale blue, if Losers selected (as above) these will be pink. When in Winners these will show those that got above the entered amount in running. If you type 100 into £ IP >= it will display all those that got to over 100.0 in running. If you Select % IP >= it will show all those that got above set % of their starting BSP in running. NOTE RSA uses True percentage which is $SP - 1 \times \text{Percentage} + 1$ i.e. for a BSP of 3.60 and this percentage set to 150% the runner would have had to get to 4.90, Calculation is $360 - 100(\text{stake}) = 260$ $260 * 50\% = 130 + \text{stake} =$ odds of 4.90.

Set IP	
£ IP <=	% IP <=
1002	0

Set IP: If **Losers** selected setting these will show you those runners that got to a low of whatever you set and lost the race.

Set SP: Set these to view only runners that had a starting BSP (Betfair starting Price. All odds in RSA are BSP) between the 2 selected values.

Runners: Use these to Filter (search) by selected runners. (CABS)

Year: Select year you wish to search for. If you only want to take one year out the quickest way is to select all and then un-tick the year you don't want, if you only want to look at a few use the dropdown and select the ones you want. All filters in this group work in this way.

Day of Week: (DOW) Select days you wish to filter by. (CABS)

Select Track: Select the tracks you wish to filter by. (CABS)

Select Distances: Select the distance you wish to filter by. (CABS)

Select Race Types: Select the Race Types you wish to filter by. (CABS)

Set Fave: This allows you to look at particular Fave or group of faves, setting this to 5 -7 will show only results of those that started as 5th to 7th Fave

Set the Fave BSP: Setting this range will only find races where the fave was between these 2 values.

Set 2nd Fave BSP: Setting this range will only find races where 2nd fave was between these 2 values.

State (Country if in UK IRE RSA): Lets you filter by State (Oz) or Country (UK/IRE). (CABS)

Race Group: (UK/IRE Only) lets you filter by Flat Races or National Hunt (jumps) races. (CABS)

Region: (Oz Only) Let you filter by region. (CABS)

S1

S2

S3

Settings Selector: These are pre-set settings that can control all the above with CABS (Controlled Automatically By Settings). These will only be displayed in either of the following scenarios.

- 1) You are in BSP Training and have selected a day in history and a race time on that day,
- 2) You are in BSP Check and have selected a race time for today.

There is a total of 9 pre-sets available for you to download for both UK/IRE and Oz and are available to download from our website. See icons – Settings above for more information.

5.0 Information

This Icon tells you which app you are in.

This icon tells you if you are logged into Betfair. You must be logged into Betfair to use BSP Check. Clicking on the icon allows you to log in or out of Betfair

Fave: Percentage of faves that have won the races selected by current filters.

1st & 2nd: Percentage of top 2 (fave and 2nd fave) that have won the races selected by current filters.

Out: Percentage of outsiders ($\geq 3^{\text{rd}}$ fave) that have won the races selected by current filters.

Match: Number of races that matched the selected filters.

Betfair over the years may have used many distances / types for a race so here we display what you have selected (top right of BSP Check App, Bet Finder and BSP Training) The APP will automatically add a race type in BSP Check if it can find one that matches BHA (British Horseracing Authority) We load the races types and distances from BHA the day before the racing, Betfair may use a different name/distance on the day of the race.

Tuesday	Race No.	Track	Race Type	Ran	Dis
16:50	12	Ling	Hcap	14	1m 7f 169yds

In this group of Information available in BSP Check and BSP Training we display the data from BHS (refer above) In this case Betfair today could have called this race 1m7f or 2m and the Race Mdn Hcap so always keep an eye on these, and add to your filters if necessary. Please note when you look back at previous races on the day the Filters (S settings) will use this number of runners so be sure to adjust runners if some did not run to ensure you are looking at the same data you would have been at race time.

The Sandwich Chart/Bar (SB) This is affectional know as the Sandwich bar because we want todays BSP to be sandwiched into the middle of all Blue or all yellow.

From the left: **Percentage:** This is the percentage difference between todays BSP and when the price of the fave the day it won.

BSP of Fave: This is the price of the fave when this race in this row was run.

BSP of Winner: This is the price the winner of this race paid.

Winner started as: This is the starting position of the winner of that race i.e. 5th Fave ...7th Fave etc.

Type: This is the race type of the race in this row, we have this because as mentioned above Betfair sometimes use different names for same type of race OR over the years race type has changed at a meeting but is still the same race. You find this in big events like Cheltenham festival etc.

Distance: This is the distance of the race in this row, and same applies as above.

Ran: This is the number of runners in that race.

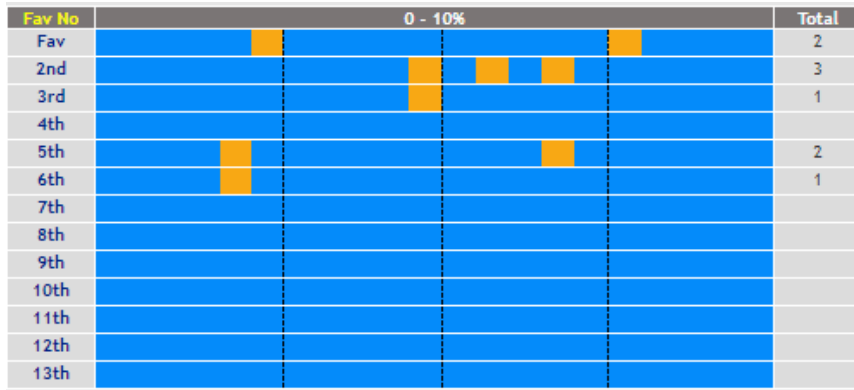

Max SP winner Paid: These are the 4 highest prices ever paid for the race, as selected by the filters.

DOW	2013	2014	2015	2016	2017	2018	2019	2020	All

Totals	584	587	557	577	586	564	575	144	4174

Race Type: I have used Oz race types here because UK/IRE has 100's. All race types are shown unless a Race Type Filter selected. Totals right and at bottom obvious.

Track	2013	2014	2015	2016	2017	2018	2019	2020	All
Alby		7	8			9			24
APrk	25	31	25	26	26	27	26		186
Arar		8				7	7		22
ASpr	5		4	9	5				23
Bair	7								7
Bala					8		8		16
Bali			7	7					14
Ball	8	19	18	9	8	10	15		87
Bank	8				8	9			25
Bath	18	16	15	15	16	14	8		102
Belm	18	16	17	15	17	16	17		116

Track: This shows the tracks that have held the type of races you have selected with the filters. This is in Winners mode if you select Losers mode it will show how many lost according to your search criteria/filters you have on.

The Race Number Tab has 5 sub directories here we will go through each of them.

Race No. - Fave SP: (BSP) lets you see what the fave of each race was paying (regardless of if it won or not) if you have multiple days of the week and or weeks selected it will only show highest prices, so this like most in here is better used for one day in one week. i.e. comparing week 22 and day 5 of all years.

Race No. – Win Pd: Same as above but shows the price (BSP) of winner.

Race No.- Count: If you used multiple days and or multiple weeks this shows how many fit into that search for each race number.

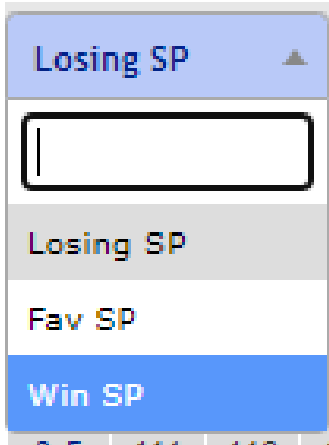

Race No. – Fave: This shows which fave one, i.e. 3rd 4th or 10th fave. Again should be used for one day in one week.

Race No. – Today: This shows you all races today and the results thereof, these can be copied and pasted into excel.

The SP (BSP) Tab has 3 sub directories here we will go through each of them.

SP
1
1.5
2
2.5
3
3.5

But first let's understand what you are seeing. Each row displays the number of times the selected filter had a result in each row. So row 1 will show all that had a BSP of 1.0 – 1.4999

SP - Losing SP: (BSP) The number of times a 1st to 50th fave has lost at that price.

SP -Fave SP: (BSP) This shows what the fave was paying regardless of if it won or lost.

SP -Fave SP: (BSP) This shows what the fave was paying regardless of if it won or lost.

SP - Win SP: (BSP) This shows what the winner paid regardless of what it started as i.e. fave or 20th fave.

7.0 Fave Check

Fave Check is a simple little tool that shows how likely the fave is to win based on the fact that a 3.0 Fave should win 1 in 3 races. For the purposes of explanation I shall use the following race.

	SP of Fav	SP of Winner	Winner Started As	Type	Dis	Ran	Max SP Winner Paid
4.07%	2.30	2.30	1	Pace M	2130	10	303.38
2.92%	2.27	6.60	3	Pace M	2130	10	230.00
2.84%	2.27	2.27	1	Pace M	2130	10	228.87
2.75%	2.27	3.40	2	Pace M	2130	10	126.18
2.31%	2.26	24.00	7	Pace M	2130	10	
1.87%	2.25	4.00	2	Pace M	2130	10	
1.36%	2.24	4.41	2	Pace M	2130	10	
1.22%	2.24	2.24	1	Pace M	2130	10	
0.89%	2.23	2.73	2	Pace M	2130	10	
0.85%	2.23	4.88	2	Pace M	2130	10	
0.52%	2.22	2.22	1	Pace M	2130	10	
							5.0%
							22
							\$2.17
							-0.96
							2.21
							NEEDS WIN
-0.44%	2.20	6.13	2	Pace M	2130	10	
-0.45%	2.20	2.20	1	Pace M	2130	10	
-1.36%	2.18	2.18	1	Pace M	2130	10	
-1.36%	2.18	3.50	2	Pace M	2130	10	
-1.36%	2.18	5.98	3	Pace M	2130	10	
-2.04%	2.16	2.16	1	Pace M	2130	10	
-3.11%	2.14	2.14	1	Pace M	2130	10	
-3.14%	2.14	110.00	7	Pace M	2130	10	
-4.07%	2.12	8.98	2	Pace M	2130	10	
-4.18%	2.12	2.12	1	Pace M	2130	10	

10 selections	Unmatched Bets	BSP	W/L	Fave
8. Lord Rosco Mark Johnson		2.21	Winner	2
1. La Suleim... J C Young		4.49		3
3. The Black... M D Young		10.00		4
4. Whoswho... A F De Campo		10.75		5
2. Be On Gu... M K Brown		11.50		6
7. Im John... K J Harper		75.00		7
9. American... E R Harris		195.46		8

In the above we have the percentage set to 5%. What this means is it will calculate everything in the SB that is 5% or less, which in the above case is the entire SB.

Stage one count all that have lost within that percentage. The answer is 13. Or – 13 points.

Now add all the times it won $2.30 + 2.27 + 2.24 + 2.22 + 2.20 + 2.18 + 2.16 + 2.14 + 2.12 = 19.83$ – stake = 10.83

So now we have lost 13 and won 10.83 meaning it currently has a net loss of -2.17 if it wins this race it will go to $-2.17 + 2.21 - 1$ (stake) = -0.96 SO even with the win it is still not above zero.

Hope this make sense, basically all odds end up at zero at some point and that just tells you how far away in this race the Fave BSP is from that point. Then based on that says whether it is due a win or a loss. Obviouly it needs more than a few to match criteria before the answer is worth anything, so we have set that to 6 (goes green if 6 matched % lookup criteria). The other think is if todays Fave BSP sandwiched in Blue it will always say needs win, you just have to figure out from all available data if that is likely or if punters always get the selected race wrong.

5.0%	Selected percentage
22	Match selected percentage
\$2.17	Current situation
-0.96	Situation if it wins
2.21	Todays BSP
NEEDS WIN	Result of calculation.

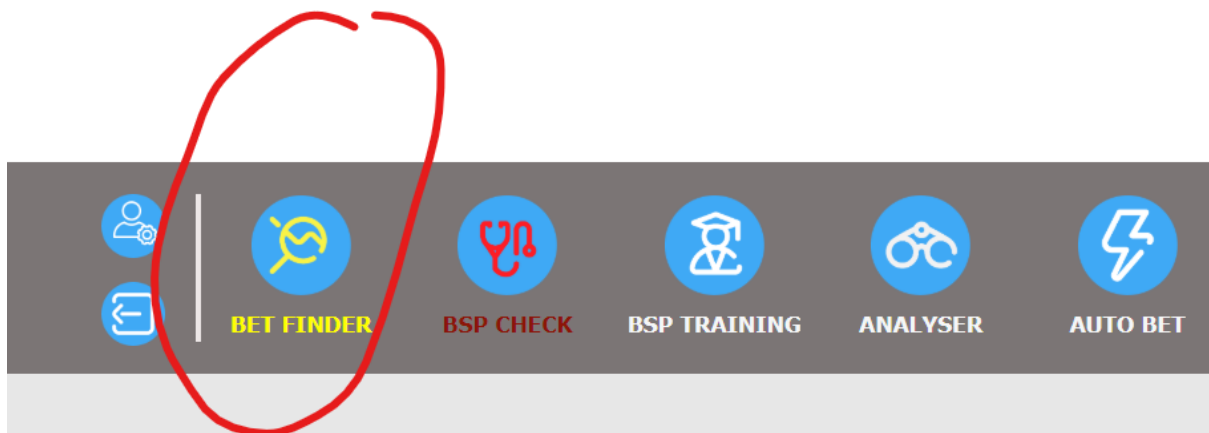

8.1 The APPS – Bet Finder

Bet Finder is a reverse look-up of sorts. You don't use it so much for finding out which type of race won at which odds, but rather where or in what type of race, for example, a 7th favourite or odds of 30+ have won historically because it is a fact that history has a tendency of repeating itself – at least when it comes to odds in horse racing.

The Basics

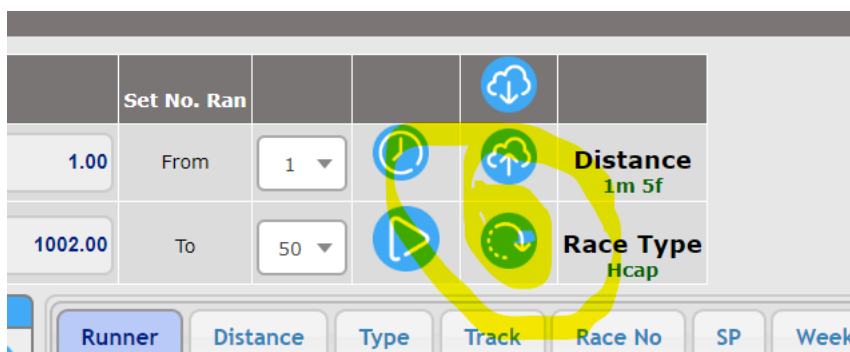

If you are looking for a strategy today, you need to ensure that yesterday's results are updated. This happens for Australia at 11.15am Sydney Time, and for the UK at around 8.30am GMT/BST.

Once you are signed into the app, click on Bet Finder on the top, just to the right of the centre:

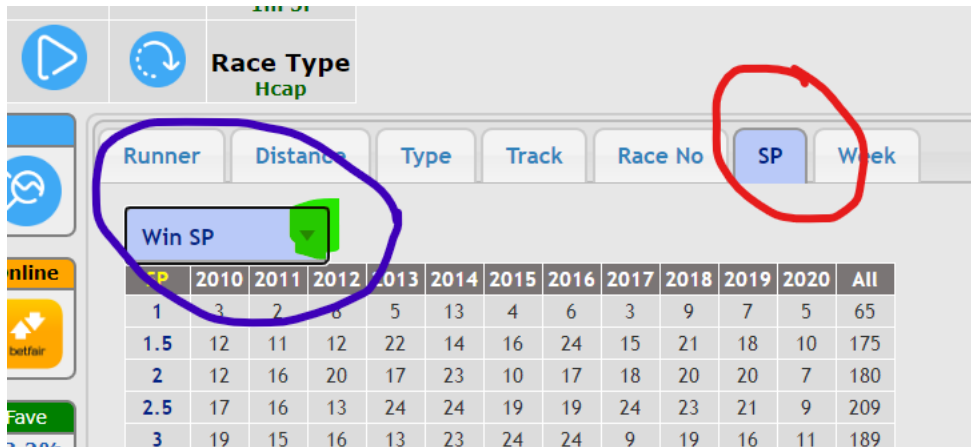

If you want to find where the money is to be made in today's races, consult Bet Finder. For example, you want to see how many 5th to 9th favourites won today in history. Bet Finder will show you.

First of all, reset Bet Finder to default by clicking on the default button:

This will give you the current week we are in, so if you are looking at this week historically, then just leave it at the default setting and hit the Play button located to the left of the default button.

Once the screen is populated with all the data, look at the SP of the winners:

Click on the SP button (red circle above), then click on the green highlighted down-arrow and chose Win SP. Then take a look at the higher odds to see how likely they produce a winner – or winners – this week.

You can do the same for just today (always make sure the site is updated to include yesterday’s results) and see if any of the bigger winners are likely.

The following screenshot shows the BSP of the winners for week 32:

Win SP	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	All
1	3	8	7	12	5	11	8	7	9	4		74

There are several types that have produced those high-odd winners every single year, and Handicaps are winning by far with an average of 160+. Novice Stakes, Maidens/Maiden Stakes/Maiden Handicaps, Handicap Hurdles, Nursery and Maiden Hurdles are also worth a closer look, so we'll include those in the next look-up, which is race specific:

The image shows a betting filter interface with the following elements:

- Winners** (selected) and **Losers** (deselected) tabs.
- Year**: Select years dropdown.
- Day of Week**: Select days dropdown.
- Select Track**: Select track dropdown.
- Select Distance/s**: Select dist dropdown.
- Select Race type/s**: 8 selected dropdown (highlighted in green).
- Set Fav (i.e started as 6th fav)**: All To All dropdown.
- Set the Fav BSP**: Two empty input fields with a 'To' label between them.
- Set 2nd Fav BSP**: Two empty input fields with a 'To' label between them.
- IRE/UK**: Empty dropdown.
- Jump/Flat**: All dropdown.

Hit Play after selecting the race types, and then see if it is worth narrowing the selection down further by looking at runners. With the above scenario, we have these numbers of runners:

Runner	Distance	Type	Track	Race No	SP	Week						
Runners	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	All
6	1											6
7		1	1		1				1	1		35
8							1					8
9		1			2			1				36
10			3			2	1	1	1	1		90
11	1			1	1	1						44
12	1						1	1	1	1		60
13			1	1	1			1		1		65
14	1	1		1	1		1	2		1		112
15		1			1	1						45
16						1	1					32
17				1					1			34
18	1											18
19										1		19
22								1				22
24									1	1		48
Totals	5	4	5	4	7	5	5	7	5	7		674

12-14 runner races show the highest number of results, so we can add that selection to the filter, but it might be worth to broaden that range – 5-15 or thereabouts and just paying close attention to the data of each race:

Next is the look-up of losers. This can be found by clicking on Losers right next to winners at the top left. The years 2012, 2014, 2016, 2017 and 2019 resulted in a profit of between 19 and 130 points if played indiscriminately. If you don't suffer FOMO, look at each race's slide individually, and only play the ones that correspond accordingly (ie show one or more high-odds winners for that particular race), then it may well be worth giving it a go, but for something broader – ie more likely races that fit the bill – looking for lower odds may be the way to go.

For the record, Monday of week 32 produced the following:

Time	Runner	Distance	SP	Points
14:50	Rosc	Mdn Hrd	13	68.07

Tuesday:

16:15	Catt	Hcap	9	17.86
16:20	Sthl	Hcap Chs	12	45.42
16:30	Bev	Hcap	6	18.67

Wednesday:

15:35	Ascot	Hcap	1m 4f 1yds	3	Look Closely	5.53

In a nutshell, Bet Finder gives you an overview of which favourites and/or which odds are likely to produce profit. In the above case, it would have been paid to keep the selection of runners broader; as you familiarise yourself with the software as well as horse racing if you don't have years of punting experience, you'll get a feel for when to take into account the number of runners (example: 3-runner races will make a profit if you bet on 2nd and 3rd over the course of a year; in races with 6 and more runners, if the top 2 have a BSP of 2.5 to 2.99, they're not likely to win and betting on 3rd downwards will result in profit over the course of a year – look it up on Bet Finder).

That, combined with BSP Check for the race will help decide whether or not to go for a race, ie place bets. Once you've learned the ropes, a race or two each day will be all that is needed to make a daily wage. Some days, only a couple of races will be worth playing; other days, ten or more races will fit the bill.

It is possible to do the same with Bet Finder for a given day instead of an entire week, especially if you are only near the computer early on or towards the end. See what did well and keep that in mind when checking BSP to see if a race is worth playing.
